FOR IMMEDIATE RELEASE

Road Construction Starts Monday, July 25 On Buffalo And Cimarron Between Sky Pointe Drive And Grand Teton Drive, And On Elkhorn Road From U.S. 95 To Tenaya Way

Work To Continue Through Mid-October

Starting Monday, July 25, and continuing until mid-October, there will be construction of new roadway improvements on Buffalo Drive and Cimarron Road between Sky Pointe Drive and Grand Teton Drive, and on Elkhorn Road from U.S. 95 to Tenaya Way. Work hours will be 7 a.m. to 4 p.m. Monday through Friday. Traffic generally will be restricted to one lane in each direction around the clock until construction is completed.

Preliminary work was completed last year, consisting of improvements to pedestrian crossings to meet federal Americans with Disabilities Act requirements. The current work consists of removal and reconstruction of deteriorated areas of pavement; full-width, structural pavement mill and pavement overlay; median island modifications and enhancements; and installation of new traffic delineation. Vehicle lanes will be reconfigured and bicycle lanes will be installed.

Motorists are advised to use Tenaya Way and Durango Drive for traveling north and south, and Grand Teton Drive for traveling east and west, as alternate routes.

Las Vegas Paving Corporation is the contractor. The city of Las Vegas is managing the project. The project cost is estimated at \$2.6 million, provided by the Regional Transportation Commission's Fuel Revenue Indexing fund. Residents with questions or concerns about the construction can call 702-229-6227.
